Profile

Data Analyst and Software Engineer with 5+ years of experience in business intelligence, analytics dashboards, ETL pipelines, reporting automation, and internal business systems. Strong expertise in SQL, Python, Power BI, Laravel, MySQL, data modelling, KPI reporting, and dashboard development, with proven ability to convert complex data into actionable insights for management and business growth.

Experience

Data Analyst – Sales Marketing Aug 2025 – Present
Arabian Thermal Aire Industries (ATAI) Jubail, Saudi Arabia

- Developed executive Power BI dashboards for quotation pipeline, project status, PO value, target achievement, and regional sales performance.
- Built a Laravel–MySQL analytics platform to manage project inquiries from bidding stage to PO received.
- Created ETL pipelines using Python (Pandas, OpenPyXL) to automate Excel data cleaning, transformation, and import into MySQL and Power BI.
- Designed KPI dashboards for conversion ratios, quotation trends, backlog analysis, and revenue forecasting.
- Reduced manual Excel reporting by over 80% through workflow automation and centralized reporting.

Data Analyst July 2023 – July 2024
Epochs IT Solutions Remote, UK

- Developed Power BI and Tableau dashboards to improve business visibility and performance reporting.
- Created SQL queries to analyze customer behavior, business performance, and operational trends.
- Designed ETL workflows to automate data processing and reduce manual reporting effort by 50%.
- Delivered analytics insights and recommendations to support decision-making.

Software Engineer May 2022 – Nov 2022
Agile-Kinetic Cardiff, UK

- Developed full-stack applications and analytics workflows to support reporting systems.
- Built SQL queries to extract, validate, and transform multi-source data.
- Developed machine learning models to predict customer churn with 85% accuracy.
- Integrated BI reporting tools with operational databases for real-time analytics.

Software Engineer July 2020 – Aug 2021
JoeyCo Karachi, Pakistan

- Designed SQL queries and stored procedures to improve database performance and reporting efficiency.
- Built data warehouse solutions for operational reporting and performance analysis.
- Led a team involved in processing data for over 24 million transactions annually.

Junior Software Engineer Nov 2017 – March 2019
Conure Information Technology Services Karachi, Pakistan

- Built enterprise web applications using Java, Spring Boot, and Angular.
- Developed authentication and authorization systems using OAuth and JWT.
- Integrated third-party APIs to improve software functionality and support business workflows.

Software Developer Intern May 2016 – Aug 2016
Punjab Saaf Pani Company (Government of Punjab) Bahawalpur, Pakistan

- Participated in software development activities for public-sector water management initiatives.
- Assisted in application development, testing, debugging, and maintenance tasks.
- Collaborated with technical teams to support software implementation and operational requirements.
- Received strong performance recommendations for professionalism, responsibility, and technical aptitude.

Education

Cardiff Metropolitan University, UK Sept 2021 – Sept 2022
MS in Data Science

Graduated with Distinction

University of Engineering and Technology, Pakistan Sept 2013 – Sept 2017
BS in Software Engineering

CGPA: 3.07 / 4.00

Certifications & Professional Development

15 Days of Power BI – Complete Microsoft Power BI Bootcamp June 2026
Udemy

- Completed 16 hours of practical training covering Power BI, data transformation, data modelling, DAX, dashboard development, and business intelligence reporting.

The Complete Full-Stack Web Development Bootcamp June 2026
Udemy

- Completed 62 hours of full-stack development training covering frontend development, backend development, databases, APIs, authentication, and deployment concepts.

Key Projects

Key Projects

ATAI Projects Dashboard / Management Reporting System

- Built a Laravel-based quotation, project, and sales analytics platform with dashboards, exports, and management reporting.
- Implemented Highcharts dashboards and DataTables reporting for project status, quotation pipeline, regional sales performance, and KPI analysis.
- Generated AI-powered PDF management reports using OpenAI API and DOMPDF.
- Contributed to ATAI website development using **Next.js** and modern frontend architecture.

Fatoora Lite – Business Workflow Application

- Developed a lightweight business workflow and dashboard application prototype for operational process management and reporting.

Leave Portal – HR Workflow System

- Built an employee leave management portal supporting leave requests, approvals, status tracking, and HR workflow processes.

Technical Skills

Programming & Data: Python, SQL, JavaScript, PHP, Java, Pandas, NumPy

Data Analytics: Data Analysis, Data Cleaning, Data Transformation, Data Visualization, Data Modelling, Reporting Automation

Business Intelligence: Power BI, Tableau, DAX, KPI Reporting, Dashboard Development, Performance Analysis

Data Engineering: ETL Pipelines, Data Integration, Data Warehousing, Data Processing

Web & Application Development: Laravel, Blade, Next.js, React, APIs, Tailwind CSS, jQuery, Vite

Databases & Tools: MySQL, PostgreSQL, MongoDB, Git, JIRA, Highcharts, DataTables, DOMPDF, Laravel Excel, OpenPyXL

Additional Information

Work Authorization: Transferable Iqama – Saudi Arabia **Work Preference:** Onsite, Hybrid, or Remote **Languages:** English (Fluent), Urdu (Native), Arabic (Intermediate)
